

Name _____

Class _____

Moon Phases Cut 'N Paste

Cut Page Here ↑

© geoteach.com

DIRECTIONS:

1. Cut the page along the dotted line, and then cut out each Moon Phase Square along the solid black line.
2. **WRITE** the correct name of the Moon Phase on the line inside each Moon Phase Square piece, and then **WRITE** the order of the Moon Phases inside each Moon Phase Square piece, starting **CLOSEST** to the Sun and starting with #1, and ending at #8.
3. **DRAW** arrows on both the left and right sides of the orbit in the **COUNTERCLOCKWISE** direction, showing the direction that the Moon is revolving around the Earth. This is the direction in which you will paste each Moon Phase Square piece.
4. **PASTE** each Moon Phase Square, in the correct order, into the correct box on the Moon's Orbit around the Earth, found in the center of the diagram. **(KEEP IN MIND WHERE THE SUN IS POSITIONED)**
