## Part B: Calculations

Solve the following problems by showing all work, including equations used. Use appropriate units in your answer when necessary.

1) What is the molar concentration of $\mathrm{HNO}_{3}$ in a solution that has a pH of 4.50 ?
2) What is the molar concentration of $\mathrm{Ca}(\mathrm{OH})_{2}$ in a solution that has a pOH of 3.50 ?
3) What is the pH of a 2.00 M solution of $\mathrm{H}_{2} \mathrm{SO}_{4}$ ? (Assume that both $\mathrm{H}^{+}$protons dissociate)
4) What is the pOH of a 0.100 M solution of LiOH ?
5) What concentration of $\mathrm{H}_{2} \mathrm{SO}_{4}$ has a pH of 1.00 , assuming that both protons dissociate?
